**Vetrazzo LLC**, a Richmond manufacturer of upscale countertops made from recycled materials, is in full coast-to-coast distribution after signing agreements with **Atlantic Plywood Corp.** and **KVF Distribution Inc.**

“The five-fold growth of the green building industry forecast over the next three years has accelerated demand,” said Vetrazzo President James Sheppard.

Atlantic Plywood of Woburn, Mass., and KVF Distribution of Raleigh, N.C., bring to a dozen the number of North American distributors for Vetrazzo, whose eco-friendly recycled glass countertops were touted by actor and environmentalist Ed Begley Jr. on television’s “Tonight Show.”

Vetrazzo’s production facility is in the refurbished Ford Assembly Building at Ford Point.
